Green finish

*'We're delighted with our
Robinsons Lean-to
greenhouse and can't
wait to get going with
growing'*

Mrs V Jackson, Wiltshire

Robinsons' spacious Lean-to greenhouses can be fixed to most walls, although a southerly aspect is preferable. No extra base plinth is required, so there is no unsightly, proud threshold to trip you up.

These multi-purpose buildings can be used as greenhouses or sun lounges. If you plan direct access to your house, you can rest assured that your **Robinsons** greenhouse will conform with British Standards for toughened glass.

Set against a garden wall, Lean-tos are the perfect home for peach trees or vines, while still giving you plenty of space to work in.

The door can be fitted at either end, or in the side on the 6' version where double sliding doors are available. The **Robinsons** Lean-to is a practical addition to any garden.

The Dwarf Wall option

It is critical that you obtain detailed instructions from the Robinsons Technical Department before installation of base and dwarf wall

Lean-to Specifications

The standard Lean-to Greenhouse comes with the following dimensions:

Colour	Mill / Green / White
Width	5' 4" (1.625m) / 6' 5 1/2" (1.910m)
Ridge Height	8' 5" (2.564m) / 7' 10 1/4" (2.395m)
Eaves Height	5' 6 1/2" (1.691m) / 6' 4 5/8" (1.945m)
Roof Vents	24" x 24" (610 x 610mm)
Dwarf wall option	Add 3 1/4" (84mm) to the ridge and eaves height

The standard Lean-to Greenhouse consists of:

Single Sliding Lockable Door · Level door threshold · Opening Roof Vents and automatic openers (dependant on length - see chart) Eaves Guttering with integral Downpipes · Unique capping and stainless steel fixings · PLUS 4mm Toughened Safety Glass throughout.

Personalise your greenhouse with our range of accessories, see page 11.

Personalise your greenhouse with our range of Accessories

Ridge Cresting provides that distinctive finishing touch - available in white or green to suit each freestanding model.

These easy to use roller blinds fit each glazing section providing shade to easily damaged plants and vegetables.

Hanging basket brackets enable you to hang baskets from the glazing bars - no need for an obtrusive rail!

Partitions for the Royale, Rosette and Regal enable you to create a separate propagating or over-wintering area within the greenhouse.

Aluminium or tanalised timber staging and shelving to complement each greenhouse helps provide all the growing space you'll ever need. Uniquely height adjustable and very robust.

An automatic opening roof vent with XL opener and a 6 bladed louvre vent (with or without automatic opener) provide essential extra ventilation for increasing levels of air circulation throughout the greenhouse.
