

Malvern Astley

Building Base Information

IMPORTANT: Please note this building requires a solid concrete or slab foundation. It is essential that the base is completely level in all directions, an unlevel base will have an adverse effect on the operation of the doors and windows. For installation purposes a clearance of 2ft must be available all round the building to be installed.

Please be aware that these buildings are delivered in sections and will require good access to the installation site. The space required differs by building and so you should discuss this with the manufacturer or our staff if you have any queries.
